

# Shrimp Supply Chain

## List of Businesses

India, Indonesia, and Vietnam provide about 40-50% of the shrimp in the world's top markets. However, recent research reveals widespread issues in a business model that exploits shrimp workers to subsidize low prices for retailers, brands, and restaurants.

The list below identifies some of the businesses selling shrimp to consumers in Europe, the United Kingdom, and the United States that are connected to shrimp exporters in India, Indonesia, and Vietnam according to export data, U.S. import bills of lading, various company websites, and other publicly available sources between 2021-2024:

Brands	Retailers	Restaurants
